

Homework 13

1. Update your repo
2. Work through example 7 on the examples_baremetal directory . Some code is missing indicated by TODO in the comments, fill in the code so that the program works. You can use

```
npm run build
npm run deploy:7
npm run call:7
```

to build and test your code.

3. In preparation for the next lessons, install Anchor, see the lesson notes for instructions.
