

Homework 4

1. Break Solana Game

In your teams try the [Break Solana](#) game on one of the Test networks. Post a screen shot of your team's highest score on Discord.

2. Command Line Tool

Using the command line tool, send your colleagues some lamports. Check your balance and your colleagues balance before and after.

3. Rust

1. Create a project called bootcamp using Cargo
2. The main function should print a welcome message.
3. Write a 'fizz buzz' function that will be called from your main function.
 1. The function should have a loop counting up to 301
 2. If the count is divisible by 3, print "fizz"
 3. If the count is divisible by 5 print "buzz"
 4. If the count is divisible by 3 and 5 print "fizz buzz"
 5. At the end print the number of times "fizz buzz" occurred.

Read [chapter 4](#) about ownership and borrowing in the rust book
